Dongguan Zhiding Electronics Technology Co., LTD is a hightech enterprise specialized in manufacturing, designing and selling high quality LED lighting and LED related products.

LED light-emitting diodes use matters needing attention

1.

Care must be taken to ensure that the reverse voltage will not exceed the absolute maximum rating when using the LEDs with matrix drive.

2.

Flashing lights have been known to cause discomfort in people; you can prevent this by taking precautions during use. Also, people should be cautious when using equipment that has had LEDs incorporated into it.

3.

The LEDs described in this brochure are intended to be used for ordinary electronic equipment (such as office equipment, communications equipment, measurement instruments and household appliances). Consult All Brite's sales staff in advance for information on the applications in which exceptional quality and reliability are Required, particularly when the failure or malfunction of the LEDs may directly jeopardize life or

health (such as for airplanes, aerospace, submersible repeaters, nuclear reactor control systems, automobiles, traffic control equipment, life support systems and safety devices).

4.

User shall not reverse engineer by disassembling or analysis of the LEDs without having prior written consent from All Brite. When defective LEDs are found, the User shall inform All Brite directly before disassembling or analysis.

5.

The formal specifications must be exchanged and signed by both parties before large volume purchase begins.

6.

The appearance and specifications of the product may be modified for improvement without notice.
